

**Haji. Dr. M.N. Kamaludeen**

*Editor-in-Chief*

Dear Endocrine Surgeons,

Greetings to you all. It gives me immense pleasure in bringing forth the Indian Journal of Endocrine Surgery 2014. The journal has original articles, review articles and case reports.

The increase in the incidence of thyroiditis in the recent years, its etiopathogenesis and epidemiology has been clearly enlightened by Dr. Dayananda Babu in his case series.

From the Department of Endocrine Surgery, Madras Medical College, Chennai, The Institutional Experience in the Management of Insulinoma, a report on Unusual Case of Parathyroid Cyst, a report of Skeletal Metastases from Papillary Thyroid Carcinoma and a report of Anaplastic Large Cell Lymphoma - Unusual Malignancy of Thyroid throws light on the management of these pathologies.

Also articles on Langerhan's Cell Histiocytosis by Dr. Sai Vishnupriya and Papillary Carcinoma of Thyroglossal Duct Cyst with Synchronous Thyroid Micro Carcinoma by Dr. M.J. Paul gives us insight of such rare presentations of the endocrine glands.

The innovative approach to the Management of Diabetes Mellitus by Surgical Intervention - Gut Endocrine Axis - A route for Diabetes Cure by Dr. J.S. Rajkumar and Dr. Sai Krishna Vittal is yet another interesting topic.

I thank whole heartedly the members whose contribution of their article to this journal has enlightened us on the recent advancements in Endocrine surgery.

I also thank our founder president Dr. S. Vittal, Dr. R. Jothiramalingam, past presidents of IAES and other senior members of the association for their valuable guidance in the upliftment of our association activities.

Long Live IAES !!!

Long Live ASI !!!

With Warm Regards
